Residence telephone No. 218.

## Rules and Regulations Governing Service Furnished to Subscribers.

The following are the Rules and Regulations governing Subscribers' telephone service furnished by the IOWA TELEPHONE COMPANY within its Ames Exchange:

All telephone equipment furnished to subscribers shall be used only by the Subscriber or members of his family, his guests or persons residing with him, or by his agents or employees when engaged in his business; shall not be used in any manner in competition with the business conducted by the Company; shall not be removed from the Subscriber's premises except by an agent of the Company; shall not be connected with any equipment or appliance not furnished by the Company; and shall be surrendered to the Company upon termination of the Subscriber's right of use.

At all reasonable times the Company, through its authorized employees shall have the right of access to the premises of the Subscriber to install, inspect, or repair the lines or equipment, or to remove them upon termination of Subscriber's right of use.

The Company does not guarantee uninterrupted working of its lines or equipment. For any complete failure of service of more than twenty-four hours' duration, of which the Company is promptly notified in writing, a pro rata abatement of the contract charge will be made.

The Company reserves the right to change the Subscriber's telephone number or designation at any time.

The Subscriber will be required to pay the Company's customary charges for any change in the location of his telephone equipment, made at his request.

The Subscriber agrees to pay the Company at its established rates for all supplemental service or equipment which the Company may furnish upon his written or verbal order.

The Company may at any time demand payment on account in advance of the establishment of service.

All bills are due when rendered, and are payable at the Company's office. Failure to receive bill, however, does not exempt the Subscriber from prompt payment as required by contract. In the event of any default of payment or other breach of the terms of its service contract, the Company may discontinue the Subscriber's service, or disconnect or remove his telephone equipment.

"The Company assumes no liability for damages accruing from errors or omissions in making up or printing this directory. Every effort is made to avoid errors, but mistakes will occur, and the liability of the Company for such mistakes is governed by rules and regulations of the Company."

# General Information

**CALL CENTRAL** by removing the telephone receiver from the hook.

**WHEN THE OPERATOR ANSWERS** your signal by saying "Number," give her the desired Telephone number, slowly and distinctly, one figure at a time, as: "four, five, two," (452) and see that she repeats it correctly.

**HANG UP THE TELEPHONE** when through talking. This signals the operator, automatically, that you are through, and until then she will not disconnect your line.

**TO CALL IN THE OPERATOR** for a second connection, or to correct a mistake, move the hook slowly up and down a few times. This flashes a small electric lamp signal in front of the operator, but if done too quickly may not be noticed by the operator.

Calls given by name instead of by Telephone number must be referred to a special information operator, as your regular operator is not provided with any printed list of subscribers and is not allowed to delay answering other calls while looking up numbers of subscribers called by name. Subscribers will no doubt recognize the importance of this rule in promoting good service, and their co-operation in enforcing it will be greatly appreciated.

**TO MAKE A "LONG DISTANCE" OR "TOLL CALL,"** ask the operator for "Long Distance" and give the Long Distance operator your own Telephone number and the name and telephone address of the person you wish to be connected with.

---

**CALL THE REPAIR DEPARTMENT** if your telephone is out of order.

**CALL THE CHIEF OPERATOR** if you wish to complain about a local call just completed or in the process of completion; if a Long Distance call ask for the "TOLL CHIEF OPERATOR."

**CALL THE MANAGER'S OFFICE** if you wish to complain about a call not of recent occurrence or about unsatisfactory service of any kind.

---

Rural subscribers' numbers are shown in four figure numbers, the first two figures indicating the line, and the second two the code ring, as, Number 2906, means line number 29, and code ring 6, which is one long and two short rings.

Number 5917 is line 59, and code ring No. 17, which is two short and one long ring.

# TOLL RATES

## NOTICE TO TOLL PATRONS

No charge will be made for toll line service when a particular person is called for and cannot be found, except the messenger service, if any, to look up the party. If, however, a firm or telephone number is called for, without specifying any particular person wanted, and the connection is once established, the regular tariff rate will be charged.

Subscribers desiring toll line service will be held responsible for all toll line connections originating from their telephones. No refund will be allowed unless claimed within twenty-four hours after an unsatisfactory service. Bills for toll service will be rendered monthly. When payment is refused, the subscriber's line will be barred against further use of Toll Lines until payment is made at this office.

Frequent applications are made to this Company's employees for the transmission and delivery of oral or written messages for toll line patron; but, while the Company desires to afford every reasonable accommodation to the public, the use of its lines is authorized only for and by patrons personally present at the telephones.

The Company does not undertake to transmit or deliver oral or written messages, and will assume no responsibility for such service. Any person or employee who assists patrons in communications does so, in each case, solely as the individual representative of the patron.

The Company's advertised rates for toll service cover in each case but one connection, and use or retention of the line not to exceed the minimum time shown on the Company's standard schedule as representing one communication. For all further or additional use or retention of the line in excess of the first period an additional periods, as shown on effective consecutive charge will be made for rate schedules.

# Telephone Equipment Costs Have Doubled in Two Years

Material used in the manufacture of telephone equipment that could have been purchased for \$50 two years ago cannot be bought for less than \$100 today.

The following figures show the per cent increase during the last 20 months in the market price of several of the more important items used in the manufacture of telephone equipment:

<u>Material</u>	<u>Increase</u>	<u>Material</u>	<u>Increase</u>
Aluminum	108 per cent	Lead	94 per cent
Batteries	68 per cent	Lumber	20 per cent
Brass	174 per cent	Platinum	98 per cent
Copper	126 per cent	Rubber	39 per cent
Crossarm Bolts	175 per cent	Tin	66 per cent
Crossarm Braces	274 per cent	Wire (Iron)	20 per cent

These advanced prices are caused principally by the European demand for war materials and to the curtailment of foreign imports into this country.
